Dear sir/madam,

My 10 years of experience as a applied psychologist should be of interest to a rapidly growing organization like yours.

In various capacities in IT, I developed myself as a software developer, which is my hobby. I have acquired skills in all phases of programming, including programming languages in back-end and front-end development, app development and web development, and AI and machine learning. Besides that, I have acquired my soft skills as a banker and an applied psychologist in all phases of psychology like training, education, coaching, counselling, practical research, and assessment research.

I am from the Netherlands and everything is flat here, so I want to relocate to the mountains. I am sure I can contribute to your growth and profit. I can work remotely, and I am looking for a job as a junior developer. I would appreciate the opportunity to show you how I can help your organization meet its goals.

Kind regards,

Niels Hoekstra
